Thumbelina Zinnia

An All-America Gold Medal Winner

1963 AAS Awards

Hercules squash,
Buttercrunch lettuce,
Emerald Cross cabbage
Greyzini summer squash,
Executive bush snapbean,

Dwarf, about 6 inches high and starting to bloom even at 3 inches, this new everblooming type is in mixed colors of 1½ inch double flowers. Compact globe or dome shaped plants are used for edging, low bedding, pots, window and porch boxes or tucked away in rockeries. It's a natural pot plant item and easily grown by direct seeding. Anybody can grow zinnias

FIRECRACKER ZINNIA

Silver Medal award winner

'Firecracker' zinnia is the other All-America flower for 1963. In extreme contrast, this is the largest of giant cactus-flowered zinnias and on a 30-inch bushy plant, clear rich red with scarlet undertone. Firecracker is the first F1 hybrid zinnia introduction. Most vivid in color, 6-inch flowers with 2-inch depth burst into a mass of color to almost hide the foliage. As large as are the blooms and fully double, the waved and quilled petals give a light and airy appearance without the heaviness of flat petalled giant types. Exciting in bouquets. Extra hybrid vigor also shows resistance to mildew,

BURNETT-SEEDSMEN Inc

23-25 WARREN Street NEW YORK 7, N. Y.

The Fashion Parade of the Garden

ASTER DUCHESS

Duchesse Strain is very vigorous, grows 24 inches tall; with long strong stems and deep brilliant green foliage. The large, globe-shaped flowers measure 4½-5 inches in diameter, with incurved petals and resemble giant flowered Japanese or Football Mums. It blooms from September thru frost and is exceptionally good for cutting, since it will last 15 days in water.

Yellow. **Delicate Pink.**
Dark Blue. **Bright Rose.** **Mixed.**
Pkts. 35c , 4, \$1.00

Aster SCARLET PIMPERNEL

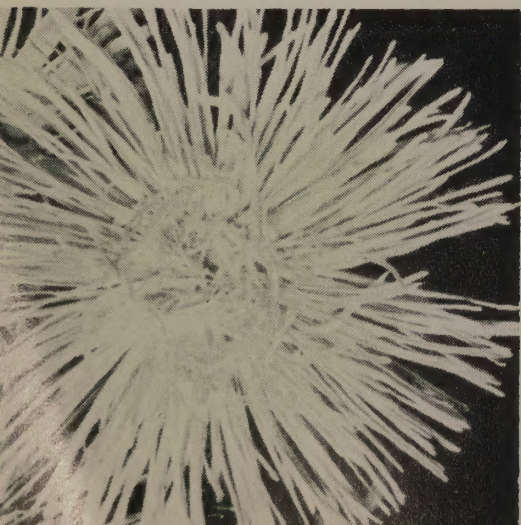

The reddest of all Asters. good stiff stems for cutting Good keeper 35c

EARLY CHARM MIXED. Very early to flower, in full bloom before the heat of Summer. Long stems support a profusion of full-double 3 inch blooms. Petals are broad and overlapping. Color range most complete, from white to deepest purple. Makes an attractive display when used in mass effect in the garden; a fine cutflower. 18 in. Pkt., 25c.

PINK LADY Aster. Mid-season, giant double incurved rich salmon pink, an entirely new and long sought-after pink. Long stout stems, free from branching. Highly productive. Pkt. 25c

Aster, Unicum Long, needleshaped petals make Unicum the most popular mixture Pkt. 25c

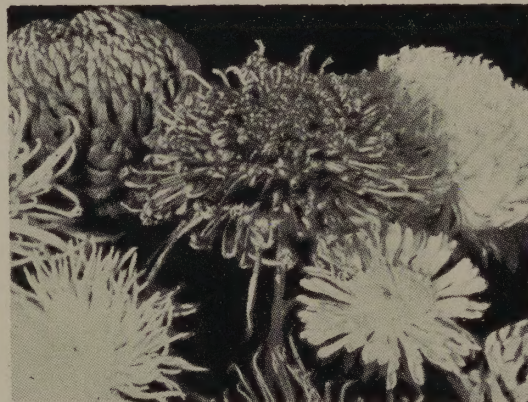

ROSIE O'DAY Alyssum. An AAS silver medal winner for 1961, it is a procumbent or prostrate type with a compact, neat habit and color. Plants measure 3-4" high and 10" in diameter when full grown. Flowers bloom early and remain a deep rose pink

Pkt. 25c; (1/16 oz. \$1.25)

ORNAMENTAL BASIL

"**Dark Opal**" is excellent for borders and mass plantings and has the additional value of being an herb used for culinary purposes. It has a very uniform plant habit with an average height of 15 inches and a spread of 12 inches. The foliage is a very attractive dark purplish-bronze shade. Small lavender-white flowers are borne on a slender spike and make a striking contrast with the foliage, pleasantly aromatic. Pkt. 25c

Chrysanthemum, EARLY GARDEN MIXED. Starts flowering already in August, mostly full double, some are semi-double and a few singles. Flowers from seed the first year often comes 3 inches across Pkt. 50c

Celosia Rose Beauty—New color in cristata type. Has huge bright deep rose combs borne on dwarf plants. Uniform habit. Vigorous. Pkt. 40c

**TIRED OF RESEEDING
YOUR LAWN EVERY YEAR?**

Then sow **ZOYSIA Japonica SEED**—

Chrysanthemum Korean hybrid

This is entirely different. Mostly full double and semi-double and a few singles. Large flowered than regular type, measuring up to 3 inches across. The colors are most fascinating as they are clear and bright never found in old Korean type. Pkt. 50c

**EARN 20% BONUS ON
FLOWER SEEDS . . . \$2.50**
If you purchase \$2.50 worth or more of flower seeds (only) you may include 20% more value of flower seeds free.

Dianthus

BRAVO **ALL-AMERICA SELECTIONS** 62, the intense scarlet-red, dwarf, annual dianthus so much admired in All-America trials. Plants grow only 8" tall, are upright and compact in habit, and produce a steady supply of brilliant flowers from late summer to frost. A perfect little trouble-free edging plant. Pkt. 25c; (1/16 oz. \$1.25)

DIANTHUS BABY DOLL.

Plants scarcely 6 inches tall are smothered with flowers of really giant size, in rich, lustrous combinations of crimson, carmine rose, blush pink and white. ideal for edging Pkts. 35c

GAZANIA splendens hybrida grandiflora

In bloom the entire summer, it never tires, always looks fresh and neat. Easily grown, it thrives on heat and drought, and continues to bloom until cut down by frost. The flowers are large 3-3½" across, and borne in great profusion. Bronzy reds, lavender pinks, pure pinks, rose, glowing orange, Pkt., 35c 1/16 oz. \$1.50

WE DON'T CLAIM TO HAVE THE BEST

BURNETT-SEEDSMEN do not claim to "have the best seeds in the World." but it's possible you can produce the best flowers with them.

Burnett-Seedsman leaves the growing of flower seeds to the wholesale flower seed growers like Bodgers, Pan Pacific, Vetterle & Reinelt, Roggli Bros. etc. They are specialists in their fields.

Burnett-Seedsman specialize in serving you by selecting the best varieties from these growers. These seeds are packeted for distribution to you, the gardening public.

We answer questions.
We advise, when asked.
We submit estimates.

May we serve you?

OLD MEXICO ALL-AMERICA SELECTION '62. This new tetraploid zinnia is of the same family as Persian Carpet, but it has much larger blooms, averaging 2½" across. The flowers are sharply bicolored, with the main petal area a deep mahogany-red, and with the petal edges and tips overlaid with shades of gold.

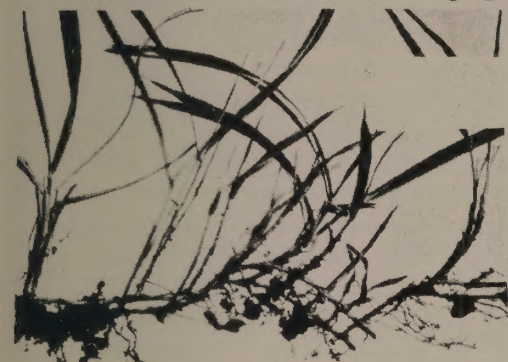

Plants grow 12" to 15" tall, producing a large number of blooms over a long period.

Pkt., 25c. 1/16 oz. \$1.50

TO KEEP CRABGRASS OUT OF YOUR LAWN SOW ZOYSIA LAWN SEED

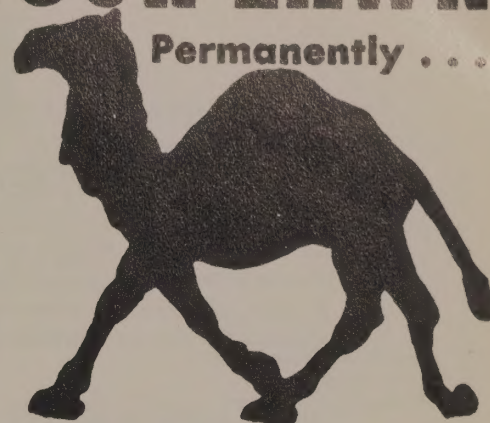

APRIL MAY JUNE JULY AUG SEPT

Zoysia surface runners

WHAT IS ZOYSIA JAPONICA SEED LIKE?

It is like clover, only a little longer and has a hard coat (of shell or hull). This tough coat, when sufficiently moistened will soften and permit sprouting. How long this takes depends on how constant moisture is maintained about the seed. Time has varied from six weeks to six months and sometimes a year. Hulled seed, that is seed from which the coats have been removed, will sprout in about two weeks.

Permanently . . .

Drouth Resistant grass

OUR ZOYSIA SEED INCLUDES 25% HULLED SEED

Each pound of Burnett-Seedsman's Zoysia seed now includes 25% hulled seed by seed count. The hulled seed should make a showing in a few weeks, and the unhulled seeds won't show until later as mentioned above. For quicker results be sure and sow the Zoysia seed that includes 25% hulled seed. For still quicker results sow Hulled (95%) Zoysia seed (higher prices, see below).

START TODAY to Convert Your Old Lawn to ZOYSIA

OVERSEEDING YOUR OLD LAWN

Sow one pound of seed over 600 sq. ft. of your old lawn. Rake lightly with lawn rake to get the seed down to the ground and water daily except on rainy days. That's all there is to it except to have patience. When your regular lawn needs mowing, mow it. This mowing won't disturb the Zoysia seed. Spike rolling before seeding helps get the seed covered better.

NO CRABGRASS OR OTHER WEEDS WILL GROW IN AN ESTABLISHED ZOYSIA JAPONICA

SEEDED LAWN, because

Zoysia Japonica seeded lawn spreads by surface runners from which grass blades sprout at short intervals. So numerous are these grass blades, they interlace to form a dense mat that inhibits any other vegetative growth.

Since Zoysia Japonica seeded lawns are heat and drought resistant they grow best in the Summer, producing an attractive dark green turf in contrast to the brown, burnt-out regular lawn grasses that are intolerable of heat and drought.

Zoysia Japonica seed will produce a lawn in any soil—sand, clay or rich loam with an alkaline analysis of 6.6 to 7.2 ph.

Zoysia Japonica seeded lawn is cushiony and indestructable, so much so that it withstands children's play and heavy picnic traffic. In fact it is so tough it is used on airports, golf fairways and play grounds.

Zoysia Japonica seeded lawns do not require as much fertilizing as regular grass lawns; a Spring application of 20 lbs. 10-6-4 or 10 lbs. Ureaform to 1000 sq. ft. is sufficient.

An established Zoysia Japonica seeded lawn does not require the constant water sprinkling that regular grass lawns demand in order to survive.

You save on insecticides and weedkillers since Zoysia grass is unaffected by disease or insects and no crabgrass will grow in an established Zoysia lawn.

Zoysia Japonica grows only 9 inches in height if left uncut. This means less mowing, about $\frac{2}{3}$ less a season.

The blade is somewhat coarse about the width of Red Top; by actual measurment $\frac{3}{16}$ inch at it's widest.

While Zoysia Japonica seeded lawns are heat tolerant, they are also Winter hardy and permanent. Up North, they brown-up in the Fall only to green-up again in the Spring (April). Therefore, you do not have to re-seed every Fall and Spring. In warmer climates they remain green much longer, while in tropical sections they are evergreen.

A bulletin from Beltsville Experiment Station recommends overseeding Zoysia seeded lawns after the first season with Merion Blue and Pennlawn Fescue for year round green turf.

Straight Hulled Seed (95%)

$\frac{1}{2}$ lb. \$6.50; 1lb. \$12.00; 2 lbs. \$23.00; 5 lbs. \$50.00
(1lb. will sow 1,000 sq. ft.)

Unhulled Seed (containing 25% Hulled Seed)

1 lb. \$6.00; 5 lbs. \$25.00; 10 lbs. \$47.50 ppd.
(1 lb. will sow 600 sq. ft.)

Facts, not fables

THEY TELL THEIR STORY

ZOYSIA LAWN SEED

JOEL E. FISHER
25 WEST 43RD STREET
NEW YORK 36, N. Y.

October 14, 1960

Burnett-Seedsman, Inc.
23-25 Warren Street
New York 7, New York

Dear Sirs:

As to your letter of the 11th about Zoysia - we now have several of our lawns completely in Zoysia - it took three or four years for the Zoysia, seeded over the ordinary lawn grass, to spread solid. At the end of the first year after seeding, there had always been very slight evidence of germination - at the end of two years, just a little; then it begins to spread, and in four years, is solid.

In Summer, the Zoysia carpet is very satisfactory; although somewhat coarser in appearance than lawn grass, and never completely free of brown filaments of dead cuttings - which seem to stay in evidence very much longer with Zoysia than with ordinary lawn grass, it is completely unaffected by drouth, needs no fertilizing, and its solid mat is so completely impervious that germination of any weed is just impossible.

Unfortunately, by mid October now, it is beginning to turn brown, and it will remain brown until the end of April. As we do not occupy our Oyster Bay house in Winter, this is of no special importance to me, although I will say that Mrs. Fisher does not like that effect.

We intend to try dyeing a part of it, this Winter, as an experiment. I do not for one instant think that rye grass could be seeded into it, for a winter-green color - the mat of Zoysia is so thick that not one dandelion or plantain can get room to germinate - if those tough weeds cannot, rye grass could never get started.

One problem is, however to ever eradicate it. Mrs. Fisher wanted it removed from one terrace (150' x 30') - a roto-tiller could not break the Zoysia sod - we had to get a small tractor and a field plow - then a chopping harrow to cut up the yard-wide pieces of sod - then we sifted it all through mesh-wire - and reseeded with a lawn grass. Two years later, now, the short ends of Zoysia runners that got through the wire screen have completely taken over, and it is once again solid Zoysia. Mrs. Fisher wants to start again - the only thing would be a powerful weed-killer to saturate the soil for six months.

All in all, the Zoysia is very satisfactory for a situation where winter-brown is unimportant, and where its persistence will be acceptable - but it must have been not yet fully developed when I wrote my earlier testimonial that it stayed green all winter - nor did I then know how powerful and persistent it would become.

Very truly yours,

Joel E. Fisher
Joel E. Fisher

jef/jk

Mrs. K. says, "Last September, I overseeded my Zoysia Lawn with common Rye grass which sprouted in six days. It remained green all Winter, up until the Zoysia started to green-up in April. Since the Rye Grass did not root thru to the ground, only amongst the Zoysia, it died off."

ZOYIA SEED CUSTOMERS REPORT THEIR RESULTS:

Mr. Ban—Sowed 3 lbs. about 10 years ago, has grown in Sun only, began to spread the second year and is still spreading, looks poor in winter but thick, strong and green in Summer without any care.

Mr. Kram—Sowed May 1958 over old lawn, covered with vermiculite, first year no evidence, 2nd year it appeared. Last Summer large patches developed.

Mr. Fel—Sowed Zoysia mixed with Merion Blue over old lawn and bare spots in July watered 3 times daily top dressed with peat moss, sprouted in 30 days.

Mr. Fuh—sprouted in 2 weeks from a July sowing of all hulled seed. No sprouting yet from the mixed lot of hulled and unhulled.

Mr. Stew—In Sept. 1961 sowed all unhulled seed on bare spots germinated in Spring 1962. Summer of 1962 sowed 5 lbs. over established Blue Grass lawn, sprouted in one month. This did better because of more warm weather, more watering and because it contained 25% hulled seed.

Mr. Dick—Sowed over old lawn May 1960, sprouted following July, began to spread in 1961. Browned lawn spots were cleared and within 6 to 8 weeks Zoysia over ran these spots.

H. Danisi of Bayside, N. Y. writes, "Sowed Zoysia Japonica seed three weeks after applying Cyanamid over 5" spaded ground. Next I raked ground, rolled it, and watered it before covering it with plastic sheeting. Watered it twice daily for 5 to 6 weeks after which signs of growth appeared. Removed sheeting and continued watering. Later, I applied Rye grass, so it wouldn't appear spotty. But as time went on, the Zoysia spread until it took over the entire area. Using the plastic sheets help to preserve the moisture and heat and prevent the seed from washing away."

"I sowed 25 lbs. Zoysia seed July 23rd., seed sprouted September 30, same year." H. S. Elmont, N. Y.
- From East Meadow, J. W. writes, "I sowed 1 lb. Zoysia seed over 3000 sq. ft. area. After a few years. it has spread over 2000 s.f."

A client in Ft. Morgan, Colorado writes:

"I ordered 1 lb. Zoysia Japonica last Spring and sowed it. Because apparent growth was so slow in developing the gardener reseeded with common lawn mixture which soon covered the barren patches. Despite this, however, those areas which had the Japonica are today a good healthy sort of sod easily discernible in the overall lawn. I will need 25 lbs. more of Japonica seed for reseeding."

New Hyde Parker writes, "Sowed pound Zoysia Japonica seed in August, saw it sprout after 1 month, second year it had good growth; third year it filled in all over."

A doctor reports, "Have been sowing Zoysia seed on my front lawn. It is showing excellent results. Most people expect results in a few weeks. The seed starts showing growth in the second year."
Dr. J. G. Jr.,

D. Marsicano of New Hyde Park writes, "Just a few lines to tell you of my success with Zoysia Japonica seed. I now have a lush green lawn in an area that was formally a hotbed of weeds, and all this was accomplished in just two growing seasons. I sowed my Zoysia with Farmingdale grass mixture over newly turned soil. It sprouted in about 5 weeks and my crabgrass trouble are over. It was a lucky day for me when I saw your ad for Zoysia seed. I always thought that the only way to get a Zoysia lawn was to use plugs. I would recommend seed to anyone desiring a Zoysia lawn."

Mr. Ris—In Arizona sowed Zoysia over cleared soil in May, sprouted in June, started to spread in August, crowded out all but Bermuda grass.

Mr. Eich—Sowed Zoysia and covered with vermiculite watered, no sprouts visible. After 2 years have a patch 10x15'. Very unhappy, will try again on smaller scale. P. S. We will mail him a free lb. of Zoysia seed.

Mr. Neh—In April sowed on clear soil, sprouted in June, has crowded out all other grasses.

Mr. Dick—Sowed on clear soil, grew dense and beautiful. Sowed second lot, soaked seed, used vermiculite, not a single blade, disappointed.

Mr. Gaw—Pre-sprouted, sowed over old grass in August, sprouted in Sept. Next spring had beautiful plot. Sowed another lot, no vermiculite, not successful.

Mr. Lai—Sowed late Summer, hurricane came, no result. Sowed again early 1962 pre-sprouted, sowed 10 lbs. in Sept. mixed with Rye Grass none yet. Hope to see some next Spring.

About Your Lawn

BURNETT-SEEDSMEN Inc.

WHAT VARIETY OF GRASS IS BEST SUITED

If one has a deep, rich, moist loam, we recommend Merion Blue and Pennlawn Fescue 50-50. With frequent watering and sufficient fertilizing they should survive the Summer. However, they are at their best in Spring and Fall. But where one has poor soil, clay or sandy, he should try Zoysia Japonica Seed. Don't expect a lawn in one season. It takes two or more years. For that reason we recommend sowing Zoysia over an old lawn. If one has patience he need not bother to water daily. If you don't have patience, then daily watering is a must. See next page for details. Remember Zoysia lawns do not require much care, no weed killing no constant watering etc.

IF YOU DON'T HAVE PATIENCE, DON'T SOW ZOYSIA SEED

After the number of years you have re-seeded your lawn, watered it and sprayed it without satisfaction don't expect a Zoysia lawn within a year. With Zoysia seeded lawns, the first year you will see only seedlings. The second year it will be more discernible, and it will begin to spread. In time it will choke out all weeds and other grasses.

BEFORE SOWING ZOYSIA SEED MAKE THIS TEST

Place a spoonful of Zoysia seed in a plastic bag, add water and keep warm. It should sprout in 10 days. If not return it.

SEED . . . VS . . . PLUGS

Economically. . . Seed is Cheaper Than Plugs: 1 lb. seed \$6.00 covers 600 sq. ft. 100 plugs cost over \$5.00 planted 1 ft. apart cover 100 sq. ft.

SEED SPREADS FASTER—1 lb. seed contains 1,300,000 seeds; if spread over 600 s.f., area, each sq. ft. will contain 2000 seeds as against only 4 plugs

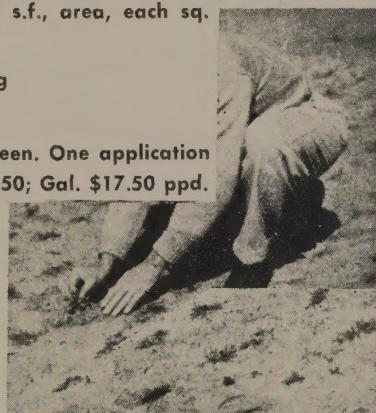

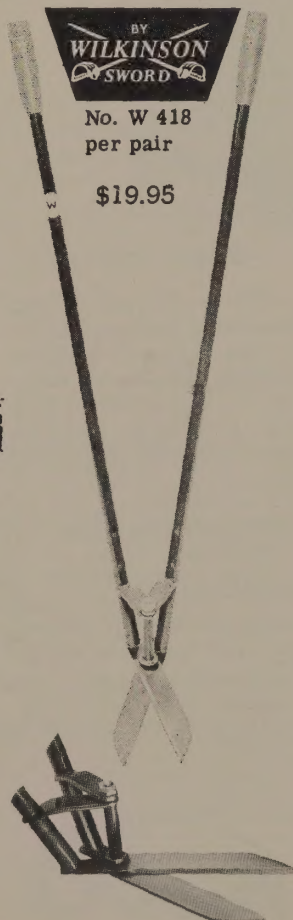

Easier to Apply—Simply sow over your old lawn, instead of digging & planting

Grass Blades—from plugs slightly narrower than from seed.

They Both Turn Brown—in Winter. For a green Winter effect spray with Stayz-Green. One application lasts until the Zoysia turns green again in April. Pt. (covers 800 sq. ft.) \$3.00 qt. \$5.50; Gal. \$17.50 ppd.

LAWN SHEAR

Where mower can't reach, the Lawn Shear can, without kneeling or crawling. Unique bolt assembly keeps hollow ground blades rigid. They stay sharp for years and do not rust.

Zoysia grass blades

Pennlawn Fescue

This creeping red fescue is distinguished by its greater resistance to disease, by its ability to withstand somewhat closer mowing and by its good sustained color in summer and also in cold weather.

NOW AT
LOWEST PRICE
IN HISTORY

MERION Prices Reduced

Merion withstands closer mowing, resists heat and drouth and holds color during hottest weather when other fine grasses "brown out." There's no weed problem with a Merion Kentucky Bluegrass lawn—even crabgrass is quickly crowded out. Disease resistant too!

TO SOW

Indoors: Use a well drained soil composed of 1 part sand, 1 leaf mold, 1 garden loam. **Mix SPERGON** with seed to prevent damping off. **Sow seeds** in flats or pots, cover lightly (don't cover fine seeds like petunia), water with fine mist sprayer; cover with glass and shade. **When sprouted** bring to light and when a few inches high transplant into pots. **Flats** or cold frame; after danger of frost is past, transplant outdoors.

ABBREVIATIONS USED

a—annual. Of one season's duration from seed to maturity and death. Sow seed indoors or in hot-bed and transplant later or sow directly outdoors after danger of frost is past. They bloom the first year from seed.

p—perennial. Of three or more seasons' duration. Sow seed through June until August, and transplant; plants live through the Winter and flower for a number of years. Protection should be used on the half hardy types during the Winter.

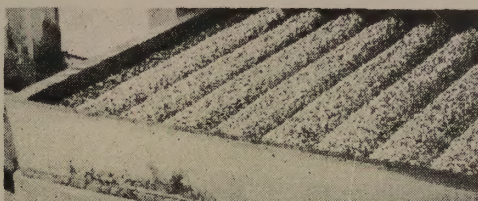

PETUNIAS ARE EASY TO GROW WITH STARTER KITS

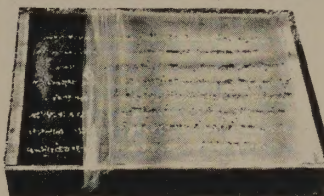

SEED FLATS FOR HOME GARDENERS

The size required for a practical seed flat is combined with lightweight and economy in this sturdy water-proof and durable flat of thick, moulded, impregnated fibre board. Do not confuse it with the too-small, flimsy type which may have disappointed you. Measuring 10 x 12 inches, it is 2 3/8 inches deep, adequate for plant bands. It weighs 4 ounces empty, is easy to handle when full of soil, and will last unimpaired through the growing season. It comes to you clean, free from insects and disease, and ready to use. Price per carton of 10 flats, postpaid \$3.50.

The professional way. Sow seed in furrow in rows and do not cover. Water gently.

Seeds protected by a Plasticover simplify your germination problems

When sprouted remove Plasticover

CENTROSPRAY RUBBER SPRINKLER with two sprayheads. Sprayhead A (for spraying water), sprayhead B (for dusting powders). For sprinkling seedlings, plants, etc. and clothes. 8 oz. capacity, price ea., \$1.75; postpaid.

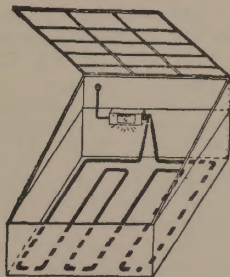

root grow right through the walls PLANT-A-POTS

To prevent transplanting shock, sow seeds directly in Plant-A-Pots. Later, set the plants in the garden, pot and all, without disturbing the roots. Roots grow unchecked, penetrating the molded peat-moss pot walls. Used successfully by florists.

ALUMINUM COLD FRAME. This quality frame is covered with plastic windows. It will not rust, rot, and needs no paint. Ideal for starting seed in the spring. Excellent gift for the gardener. Easy to assemble. Size: 36" W x 42" L; Height, 12" back and 8" front. Ship Prepaid for Only \$24.95

"Just Drop a Capsule"!

Destroys Soil Pests!

WHY PAY 50c for (1) PERENNIAL PLANT
WHEN YOU CAN EASILY RAISE THEM
FROM SEED FOR LESS THAN 1 CENT EACH

?

IT'S EASY TO RAISE PERENNIALS FROM SEED

Sow perennial flower seeds from June 1st to September 15th. The use of a cold frame is ideal but **not absolutely necessary**. Lacking one, we make this suggestion: Select any out-of-the-way plot of ground, with a sunny exposure. Spade a space about 3 ft. x 6 ft. Do not use fertilizer. Be sure it is somewhat sandy. Rake smooth. Sift the top one inch layer. The plot is now ground level or slightly higher. Take a wooden slat 2 in. x 3/4 in. x 3 ft long and bevel one edge like a ruler. This is a convenient furrow marker. To use, press lightly into the ground to depth desired; remember not too deep, 1/4 to 3/4 in. is sufficient. Space furrows 3 in. apart if necessary, otherwise 6 to 12 in. apart. Sow seeds from packets, using a lateral, sifting, shaking motion; better to sow sparsely than too thickly. To cover, use sifted sand and pour it from a packet like sowing seeds. Lay furrow marker flat over covered furrow and press down lightly. When all sowing is done, water with fine sprinkler.

On each corner of the plot sink a 3 ft. stake and on each stake a nail. Now spread burlap bag over pegs, tent-like. This burlap canopy should be about 1 ft. above ground. It prevents drying out and helps break heavy rainfalls. When seedlings are a few inches high, transplant, to allow more space between plants. The following Spring or the same Fall they may be shifted to their permanent position.

BURNETT-SEEDSMEN

Seed Service

Asters a (Wilt Resistant)

Need no introduction, but what is **Wilt Resistant Aster Seed**? It's a strain of seed produced from plants that were grown in heavily wilt-infested soil. It is reasonable to infer that if a strain was able to grow to full maturity and bear seed, it's genera or offspring must likewise be immune to wilt. Don't take chances, sow **Wilt Resistant Strain Asters** wherever possible.

Princess

PRINCESS TYPE 7

(New 1941). New cutflower type similar to Aurora. 3" flowers have full crested center surrounded by several rows of strong guard petals. 24", branching, early, good keeper.
Princess Anne. Peach blossom.
Princess Elizabeth. Pure white.
Princess Bonnie. Soft salmon with contrasting center of rich gold.
Princess Margaret. Florist rose.
Golden Sheaf. Yellow self.
Princess Linda. Pure clear rose.
Princess Susan. True deep blue.
Princess Marsha. Cinnabar scarlet with contrasting center of rich gold.
 Pkt. each 25c; 1/8 oz. \$1.25
 Collection 6 colors...\$1.25

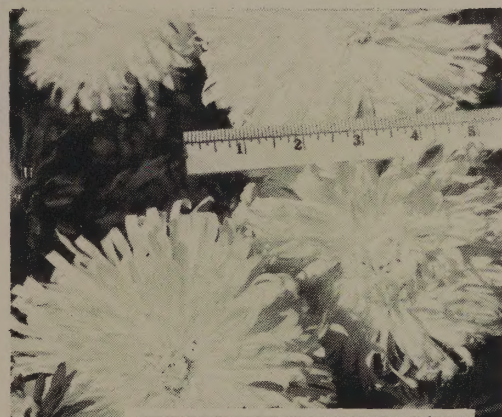

Asters prefer rich sandy or loamy soil. Use well rotted manure or phosphate fertilizer. Cultivate and water regularly. Sow seeds six weeks before intended transplanting; water immediately after. Set tall varieties 18 in. apart, medium sorts 12 in. apart, dwarf types 9 in. apart.

EARLY GIANT Wilt Resistant

Non-branching; 1 1/2 ft. Early Sept. To date (1939) the finest large flowered, heavy stemmed W. R. Aster, only 6 to 8 flowers to a plant, but extra large, with broad petals gracefully intertwined. Florist cutflower type.
Light Blue (S.M., A.A.S., '39).

Repacked Packets (from original packets): Pkt. \$1.00.
Trial Pkt. (100 Seeds) 50c.

Petunias

Every gardener grows petunias and why not. They're easy to grow, bloom until frost; brilliant colors, waved petals, fringed petals, double flowers. Alike suitable to beds, borders, boxes, pots; cutflower. For early start, sow seeds in well levelled soil flats, don't cover seed; to water use a mist spray. Transplant at least once before setting out. In the doubles, select the weakest seedlings, as they are the doubles.

F₁'S ARE ECONOMICAL AND EASY TO GROW

F₁ hybrids grow stronger and faster, are easier to grow. Fewer plants are required because of extra vigor. Allow plenty of room. Plants spaced 24 by 24 inches will give complete coverage by mid-July. Proper spacing prevents extra tall growth and falling over.

F₁ HYBRID GRANDIFLORA

Base branching, compact habit, free flowering. Flowers average 3½ to 4 inches across on plants 15

THE LUSTRES

BLUE LUSTRE (Bodger), the big waved grandiflora flowers are deep mid-blue
ROSE LUSTRE (Bodger), a new hybrid, and with a strong rose-pink color unique
SALMON LUSTRE is a rich salmon-pink.
SCARLET LUSTRE (Bodger), glowing and vivid scarlet blooms with waved and fringed petal edges and a bright yellow throat

OTHER F₁ HYBRID GRANDIFLORAS

BALLERINA, ALL-AMERICA SELECTION '52, soft, glowing salmon; fringed flowers.

BLUE LACE, light orchid-blue attractively penciled with deep violet-blue.

CALYPSO, striking red and white bicolor

CRUSADER, striped rose on white.

LA PALOMA, pure white, fringed.

MAYTIME, ALL-AMERICA SELECTION '58, light salmon-pink.

 tuce of highest quality, butter-head
 type of Kentucky Bibb Pkt., 35c. 1/2 oz., 75c

Greyzini Squash

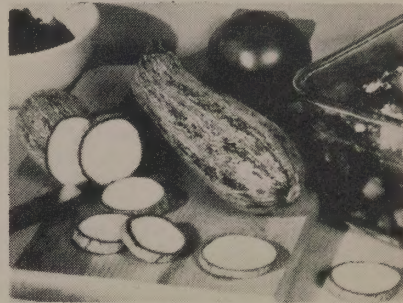

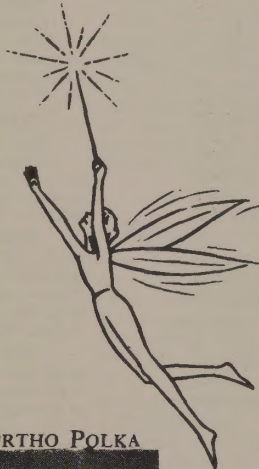

F₁ hybrid "Greyzini" summer squash,
 a Grey Zucchini type, generally found
 to be earlier, slender and longer
 cylindrical or cucumber shape, more
 uniform, and a heavier bearer on
 more vigorous bushy plants. Skin and
 flesh are tender and of fine texture in
 its eating stage. Pkt., 35c; 1/2 oz., 95c; oz., \$1.75.

Persian Carpet

ORTHO POLKA

Hercules Squash is of the
 popular Butternut type, larger and with
 thicker, straight solid neck. The vine is
 more vigorous. Very small seed cavity.
 Hercules is highly productive, almost
 all solid flesh of fine texture and top
 flavor. Flesh is rich orange, sweet and
 dry, with long lasting qualities to the
 blocky fruits. Pkt., 35c; 1/2 oz., 75c

Executive Bush Snapbean brings
 further improvement and productiv-
 ity to the Tendergreen type bean. A
 beautiful darker green, it has full
 round pods better yield and
 smoother pods. Quality is generally
 excellent, meaty with a pleasant flavor.
 Pkt., 35c; 1/2 lb., 80c; lb., \$1.35.

Emerald Cross Cabbage

With characteristic hybrid vigor this
 very early, Copenhagen Market-Golden
 Acre type cabbage was very highly
 rated over the country.

Same season to earlier and →
 same growth, about 7 inches in diame-
 ter and 6 inches thick, heads almost
 round. Very compact Pkt. 50c.

F₁ Hybrid Vegetables

The future looks bright for hybrid vegetable seed. The industry is looking for better and better quality, which is obtained by using F₁ hybrid seed. The F₁ hybrid vegetable stands for the highest quality in vegetable seeds.

Hybrids are produced by crossing two selected inbred varieties. They result in increased yield, earliness, size and uniformity, which can be summed up in the term hybrid vigor. Additional factors, such as disease resistance, are added wherever possible.

ARTICHOKE

FRENCH GLOBE (seed) Pkt. 25c.
JERUSALEM ARTICHOKE TUBERS. Cultivation similar to potatoes, in rows 4 ft. apart.....Lb. \$1.00; 15 lb. \$7.50.

BRUSSELS SPROUTS

Cultivation similar to Cabbage.
Long Island Improved. Dwarf compact, 20" plant; large cropper.
Pkt. 15c; ½ oz. 90c; oz. \$1.75

Asparagus

One ounce of seed will sow 30 ft. row. To prepare asparagus bed: dig trench 18 in. deep, 12 in. wide; fill in with 6 in. well rotted manure, then 6 in. soil; set roots 12 in. to 18 in. apart from crown to crown, spreading roots. Cover with soil and gradually fill to top as they develop. Set in rows 48 in. apart.

MARY WASHINGTON. Acknowledged the best rust-resisting Washington variety; purple green, large, brittle shoots 10 in. to 20 in. long, tight tips.

Selected Roots—
1 Yr. Old No. 1, 100, \$5.00; 50, \$3.25,
2 Yr. Old No. 1, 100, \$6.00; 50, \$3.50.
Seed.....Pkt. 15c; oz. 50c

Beets

One ounce of seed will sow 50 ft. row. Sow seed in drills ½ in. to 1 in. deep and 18 in. between the rows as soon as ground can be worked, in well cultivated soil, preferably sandy loam. Thin to about 4 in. apart when 3 in. tall and make successive plantings at 2 or 3 week intervals to obtain continuous crop until late Fall. Beets are tenderest when picked young. Fertilize with Potash.

Crosby's Egyptian (60 days). Extra early, dark red variety, globular in shape with small tap roots; tender, sweet.
Pkt. 15c; oz. 35c; ¼ lb. \$1.00
Early Wonder (58 days). Valuable early sort, also used for Fall planting; semi-globular, blood red, tender, good quality.
Pkt. 15c; oz. 40c; ¼ lb. \$1.00

BEEF RUBY QUEEN. All America Winner 1958. 50 Days. The blood red interior color free from zoning and smooth texture and cooking quality of this new beet make it very popular with home gardeners. The tops are short and dull reddish green. Excellent table quality.
Pkt., 25c; ½ oz., 40c; oz., 75c; ¼ lb., \$2.25

Perfected Detroit (A.M., A.A.S., '34) (68 days). Most popular mid-season sort; adapted for garden and canning use; flesh dark red.

Pkt. 15c; oz. 40c; ¼ lb. \$1.25
Winter Keeper. Exceptionally good keeping variety; large solid globe shaped, with short, thick, tapering roots of fine quality and flavor, retained even through Winter storage.
Pkt. 15c; oz. 50c; ¼ lb. \$1.50

POLE LIMAS—

KING OF THE GARDEN. 88 Days. Outstanding pole lima for heavy production and climbing ability. Numerous large pods filled with 5 to 6 large beans of excellent quality. Pkt., 20c; ½ lb., 60c; lb., \$1.00; 2 lbs., \$1.80; 5 lbs., \$4.00.

POLE GREEN STRINGLESS

KENTUCKY WONDER OR OLD HOMESTEAD. 65 Days. The leading pole bean, the best known and most widely used. The pods are fleshy and 7 to 10 inches long and stringless when young. Kept picked they will bear all season. Pkt., 20c; ½ lb., 60c; lb., 85c; 2 lbs., \$1.50; 5 lbs., \$3.50.

BUSH Beans—GREEN POD

BOUNTIFUL. 49 Days. The earliest flat pod variety and extremely popular in the home garden. Pods are a clear light green, wide, flat, fleshy, slightly fibrous, but entirely stringless, brittle and tender. The seeds are a solid straw color or brownish yellow. Does well in any soil. Pkt., 20c; ½ lb., 60c; lb., 85c; 2 lbs., \$1.50; 5 lbs., \$3.50.

CONTENDER. 49 Days. An excellent 1950 introduction of the late Dr. B. L. Wade. Undoubtedly the finest early home garden bush bean and perhaps the best of all sorts. Resistant to common bean mosaic and greasy pod. Pkt., 25c; ½ lb. 60c; lb., 95c; 2 lbs., \$1.50; 5 lbs., \$3.50.

GARDENGREEN. 55 Days. All America 1959. This new All America winner has proven very productive in a wide area of distribution. Vines have a concentrated set of pods which are 5-5½ inches long round and very tasty. Pkt., 30c; ½ lb., 90c; lb., \$1.50; 2 lbs., \$2.70; 5 lbs., \$6.00.

STRINGLESS GREEN POD. (Landreth Stringless). 50 Days. Medium sized bush, productive, bearing long, round pods of good color. Stringless fleshy and nearly straight. Does best in heavy clay soil. Pkt., 20c; ½ lb., 60c; lb., 85c; 2 lbs., \$1.50; 5 lbs., \$3.50.

STREAMLINER. 55 Days. This is among the most productive of the bush types. The plants bear 7 in. long, ½ to ¾ in. wide, fleshy pods. The quality is excellent; stringless, nearly fiberless, fleshy, round to flat, straight. Seed clear white, kidney shape, excellent as dry bean and outstanding for baking. Does well in medium heavy soil. Pkt., 25c; ½ lb., 60c; lb., \$1.00; 2 lbs., \$1.90; 5 lbs., \$4.50.

TENDERGREEN. 52 Days. Good sized bush bearing long round pods of medium green color. The pods are straight and stringless and average 6 in. long and ¾ in. through. Pkt., 20c; ½ lb., 60c; lb., 85c; 2 lbs., \$1.50; 5 lbs., \$3.50.

TOPCROP. 50 Days. This variety is unsurpassed for a combination of quality, yield and disease resistance. Compared with Wade it is not as dark a color, and the pods mature faster. It outyields Wade under most conditions. This is our choice as the best of all green pod bush varieties.
Pkt., 25c; ½ lb., 60c; lb., \$1.00.

WADE. 55 Days. All America Gold Medal, 1952. Supreme quality combined with heavy yield won the top award for this new variety, which experts consider one of the finest all-purpose greenpod bush bean yet developed. Pkt., 25c; ½ lb., 70c; lb., \$1.20; 2 lbs., \$2.15; 5 lbs., \$4.80.

BUSH—WAX POD

CHOCTAW. 53 Days. All America Bronze medal 1958. Choctaw was introduced by the Mississippi Experiment Station as the heaviest yielding wax bean ever observed in their trials. Pods are 6 inches long, round, stringless, bright clear yellow.
Pkt., 25c; ½ lb., 70c; lb., \$1.20; 2 lbs., \$2.15; 5 lbs. \$4.80.

BUSH—LIMA

BABY FORDHOOK. 70 Days. Small plant with vigorous branch and leaf growth. Foliage darker than Fordhook and more productive. Excellent small thick beans for canning and freezing. Cross of Fordhook and Henderson. Pkt., 20c; ½ lb., 60c; lb., \$1.00; 2 lbs., \$1.80; 5 lbs., \$4.00.

BURPEE'S IMPROVED BUSH. 75 Days. Plant large and spreading and quite productive. Pods broad, flat, usually with 4 large thick greenish seeds. Pkt., 20c; ½ lb., 60c; lb., \$1.00; 2 lbs., \$1.80; 5 lbs., \$4.00.

FORDHOOK No. 242. 73 Days. We recommend this variety in preference to Fordhook Bush, which it resembles in size and quality, but which it will outyield under adverse conditions. Pkt., 20c; ½ lb., 60c; lb., \$1.00; 2 lbs., \$1.80; 5 lbs., \$4.00.

Broccoli

Easier to grow than Cauliflower.

No other table green has captured the appetites of a Nation more than Broccoli, and why not? Its delicious fine flavor is appetizingly pleasing even to children, yet rich in iron; more easily digested and is of easier culture. Set plants 18 in. apart in rows and 24 in. between; when the center flowers form, cut with about 7 in. of stem; this will be followed later by several smaller heads. No fuss in tying up, like in cauliflower.

Fifty Day Sprouting Calabrese

Just think of it—you can pick "Fifty Day Sprouting Broccoli" in 40 to 50 days after transplanting, in certain localities; 50 to 60 in others. Seeds of this superlative variety were imported direct from the grower in Italy.

Pkt. 25c; oz. \$1.00

Cabbage

Cabbage thrives in rich, well-drained, loamy soil. For early crops, sow seeds in hot-beds in February-March; transfer to cold frames to harden, then transplant 18 in. apart in rows 30 in. apart.
Copenhagen Market. Early, round headed cabbage, compact and with few outer leaves; solid and of medium size.

Pkt. 15c; ½ oz. 50c; oz. 90c

Danish Ball Head. Short-stemmed late ball shaped, solid compact and good keeper.....Pkt. 15c; ½ oz. 50c; oz. 90c

Early Jersey Wakefield. Earliest conical headed sort; perhaps the most popular early; matures same time as Copenhagen Market....Pkt. 15c; ½ oz. 50c; oz. 90c

Mammoth Rock Red. Large, round, intense red heads; strong grower and of late maturity, good keeper.

Pkt. 15c; oz. \$1.00

Savoy Chieftain (A.M., A.A.S., '38). An earlier Savoy, compact, flat, medium sized heads; broad, dark olive green rounded leaves; short stems. Has a much higher percentage of well formed heads.

Pkt. 25c; oz. \$1.00

Sure Head Flat Dutch (Late). Finest Late Dutch type; heads are large, round and flattened, very hard and fine grained; good keeper....Pkt. 15c; ½ oz. 50c; oz. 90c

Cauliflower

100% HEADING "IDEAL SNOWBALL" Here's an easy-to-head Cauliflower producing heavier heads than Early Erfurt; stands adverse weather (hot or freezing) without ricing. Grown successfully from California to Georgia and from Minnesota to Ontario. Pkts. 25c and 50c; ¼ oz. \$1.25; ½ oz. \$2.25.

Extra Early Snowball (Select). Earliest of all. Forms firm, compact, medium sized heads, of a snow-white color. Dwarf plants with few short, broad leaves. Splendid for exhibition. Pkts. 25c and 50c; ¼ oz. \$1.00; ½ oz. \$1.50; 1 oz. \$2.75; oz. \$5.00.

Carrots

One ounce of seed sows 100 ft. row. Cultivation similar to beets. Freshly manured soil often causes divided roots, advisable to fertilize with potash in previous Fall. Sow seed from early Spring until mid-June, ½ in. deep in well prepared soil and thin out to 3 in. apart; rows 16 in. apart.

Improved Long Chantenay (70 days). Stump rooted, early and productive, of deep orange color. Fine for garden use and bunching.

RED HEART. (Red Core Chantenay). 70 Days. It has no visible core, but its rich red coloring is even throughout the flesh. The top is very strong, hence ideal for bunching. The root is of medium length, blunt smooth and easily prepared for serving.

Danvers Half Long Select (75 days). Most popular half long sort. Roots bright, deep orange, 6 in. to 7 in. long and uniformly tapered to blunt end. Very productive, good shipper & keeper.

Imperator (A.M., A.A.S., '33) (77 days). A long variety with uniform tapering to semi-blunt end, with a smooth deep orange skin and flesh, almost coreless. Has set the fashion in slim carrots.

Nantes Improved (72 days). Excellent forcing and garden variety with small core; roots 6 in. long, bright orange, cylindrical and blunt ended, flesh deep.

SWEETHEART. 70 Days. A very fine strain of Nantes type. The top is short and the root is a bright orange with the least core of any variety shown. Pkt., 25c; ¼ oz., 50c; ½ oz., 85c.

GOLD PAK. 80 days. A long slim carrot for loam and sandy loam soils. The roots are streamlined and smooth with good color both inside and out. The flavor and texture fine.

Prices on all CARROTS

Pkt., 15c. ½ oz., 50c; oz., 85c.

Celery

Sow seeds in flats during February. As celery is slow germinating, keep flats constantly moist; cover with only ¼ in. sand to keep surface from baking and transplant once before setting out about April 15th, 6 in. apart, in rows 36 in. apart. Cultivate frequently and water abundantly. To blanch use celery bleachers. For a late crop set plants out June 1st.

Easy Blanching. Excellent second early sort; vigorous, compact habit of growth and easy blanching. Attractive white, thick, solid stalks of good flavor; a fine keeper. Pkt. 25c; ½ oz. \$1.50; oz. \$2.50

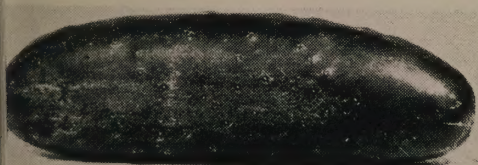

Giant Pascal (Select Utah Strain). An improved Giant Pascal, far superior; for late Fall and Winter use. Plants large, stocky and with dark green leaves; long, broad, solid stalks that blanch yellow-white; of excellent flavor.

Pkt. 20c; ½ oz. 90c; oz. \$1.50

CHICORY

Sow seed in early Spring as soon as ground can be prepared, in rather light, moderately rich soil, in rows 24 in. to 30 in. apart.

Witloof or French Endive. This variety has become very popular for Winter salads. It makes a delicious dish when served with endive or cos lettuce and French dressing. Leaves and stems blanch easily. Sow in open ground in May, in rows 18 in. apart. Lift roots in Fall, trim leaves to 1½ in. of crown and shorten main roots to 9 in., then set upright in sloping bed 18 in. deep, in moderately warm cellar. Fill trench with moderately moist, fine, rich soil. Within 3 to 4 weeks, endive 6 in. long will appear. Pkt. 15c; ½ oz. 60c; oz. \$1.00

Sweet Corn

One pound will sow 100 hills. Best results are acquired from moderate moisture, warm weather and rich soil, but it can be grown in any soil that is deeply and thoroughly worked. Sow seed either in hills or rows to a depth of 3 in. after danger of frost is past. Sow in drills 2 in. apart in rows 36 in. to 48 in. apart; thin out 8 in. apart; or sow 5 or 6 seeds to a hill 36 in. apart each way and thin out to 2 to a hill.

Golden Bantam (80 days). Most widely known and generally used yellow sweet corn. Stalks often have 2 ears of 8 rows, broad kernels with tender hull, sweet and of exceptional flavor.

Pkt., 20c; ¼ lb., 50c; lb., 85c

HYBRID VARIETIES

Hybrid varieties of corn are rapidly becoming more popular, as they are much more disease and wilt resistant; have better root systems and larger ears, of greater uniformity. This insures larger and better crops.

Golden Cross Bantam (88 days). Outstanding hybrid for productiveness and quality. Large 10 to 14 row ears; nearly every stalk bears 2 full sized ears of uniformity.

Pkt., 25c; ½ lb., 70c; lb., \$1.20; 2 lbs., \$2.15;

GOLDEN MIDGET HYBRID. 68 Days. A tender hybrid for the small home garden. A small eared, small stalked variety producing as early as any variety we know. Second only to open pollinated Golden Midget for freezing on the cob. Pkt., 25c; ½ lb., 90c; lb., \$1.50; 2 lbs., \$2.70; 5 lbs., \$6.00

HONEY. 80 Days. New hybrid bred for home gardeners, supreme in tenderness and flavor. Grows 5 ft. stalks, 12 row ears, 7x1½ inches. The sugar content in the kernels of Honey is very stable so its flavor does not cook away. Pkt., 30c; ¼ lb., 80c; lb., \$1.50

GOLDEN BEAUTY. 68 Days. Silver Medal All America winner 1955. The ears are quite uniform about 8 inches long and the kernels are an attractive bright yellow. Yields lots of corn on sturdy vigorous plants. Pkt., 25c; ¼ lb., 75c; lb., \$1.35

True Water Cress. This distinct variety thrives where its roots and stems are kept extremely moist without special care; along streams or brooks is ideal.

Pkt. 25c; ½ oz. \$1.25; 1 oz. \$2.00

CUCUMBERS

One ounce of seed will sow 50 hills. Plant after the weather has become warm. Culture same as for Muskmelons.

Hybrid Early Surecrop. (B.M., A.A.S. 1951) (58 Days) High yielding, good keeping, disease resistant White Spine type cuke; 8 to 9" long, 2½" thick, dark green; tender, crisp and of good flavor. Pkt. 25c

Smoothie fruits have no warts nor spines and are a glossy deep green; the quality is high. Pkt., 25c; oz., 75c.

Long Green Improved (70 days). Standard late sort. Excellent for slicing, fruit 12 in. to 13 in. long, deep green and prolific, flesh white and crisp, hardy.

Marketer. (65 days). (B.M., A.A.S. 1943) Rich dark green 8" x 2¼" fruits; small seed area; uniform, prolific bearer.

Straight 8 (G.M., A.A.S., '35). Recently introduced and rapidly becoming more popular as a valuable slicing sort. It is prolific, long, of medium diameter and dark green in color...

PRICES ON ALL CUCUMBER

Pkt., 15c; oz., 55c; ¼ lb., \$1.65

—except where noted.

SEEDS FOR Export—
Inquiries are solicited

F1 Hybrid Large Fruited No. 30

New Hampshire Hybrid shape trifle smaller with glossy black skin. Much earlier maturing Heavy yielder than any ordinary Egg Plants. Also highly resistant against fusarium and other diseases.

pkt., 40c; ½ oz., \$1.40; ¼ oz., \$2.50

EGG PLANT

Sow seed in hotbed in Feb.-March, transplant to flats or pots, and transplant outdoors in May, 24 in. apart in rows 36 in. apart. Requires light, warm soil for quick development.

Black Beauty. Symmetrical, large, broad, glossy black-purple fruit; early maturing, of lasting quality. Pkt. 20c; oz. \$1.25

New York Spineless. The better known of the two. Plants spreading, spineless, bearing 4 to 8 fruits; broad, oval, glossy black-purple; larger than Black Beauty. Pkt. 20c; oz. \$1.25

ENDIVE

One ounce sows 100 ft. of drill. Endive must be grown quickly to avoid bitterness and toughness; feed manure and water abundantly. Sow seed April 15th for early use; for June and July main crop in rows 15 in. apart and thin to 12 in. apart.

Batavian Full Heart (A.M., A.A.S., '34) (Escarolle). Improved form of Broad Leaved Bavarian which is considered more of a Winter salad. Medium sized plant with deep full, compact and well blanched heart of infolded broad leaves, thick and buttery in texture and of splendid quality. Few Americans know that it is an especially well flavored vegetable when boiled.

Pkt. 15c; oz. 40c; ¼ lb. \$1.25

HERBS

Among the herbs are found a wide variety of plants used for flavoring and medicinal purposes; generally sown early in the Spring on light, not too rich soil. Herb gardens are increasing rapidly in popularity, as they are ornamental as well as useful. a—annual p—perennial

Anise a. Aromatic seeds; pleasant aroma.

Borage a. Pot herb, with bright blue flowers. Attractive to bees.

Caraway p. Used for bread and pastry.

Catnip p. Mint-like leaves; a cat's delicacy.

Coriander a. Aromatic seeds used in confectionery and pastry.

Dill a. For pickling.

Fennel, Large Sweet p.

Hyssop p. Used as a mild tonic.

Lavender. (P) Sachets, perfumes, soaps

Mint, Flavoring.

Peppermint. Used for tea, 3 feet.

Spearmint. Mint juleps and general flavoring.

Rosemary p. Plants only.

Rue p. Pungent; seasoning and medicine.

Saffron a. Leaves used for seasoning and flowers for coloring.

Sage, Broad Leaved p. Pleasantly fragrant, used for seasoning.

Summer Savory a. Leaves and young shoots used for seasoning.

Sweet Fennel (See page 39)

Sweet Marjoram. Aromatic & seasoning.

Tarragon Plants

Thyme, Broad Leaved p. Aromatic for seasoning and medicinal purposes.

Wormwood p. Spicy fragrance and bitter flavor, for medicine and seasoning.

Pkt. ea. 25c; Collection 10 varieties \$2.00

SWEET BASIL

Large-leaved Naples. Lettuce-leaved,

Small-leaved Bush. Small leaves, dwarf; also ornamental; when in bloom cut and dry for Winter use. Pkt. 25c oz. \$1.00

Matchless

Lettuce

Although lettuce is easy to grow, it should be grown quickly in rich moist soil to be crisp and tender. Sow in a hot-bed in Feb.-March, transplanting to open ground 12 in. to 15 in. apart, in rows 18 in. apart. Make successive sowings to August. Cultivate and water thoroughly. Remember lettuce does best during cool weather.

hot-weather salads

SENSATIONAL NEW LETTUCES

MATCHLESS. One of the easiest Summer varieties to grow; a cross between heading and cos types, forming loose-leaved heads of great delicacy and flavor that are highly heat resistant.

Pkt. 25c; oz. \$1.00

Oak Leaf (40 days). This novel variety excels in ability to withstand hot weather without turning bitter. It's leaves are small, tender, and deep green, testifying to their richness in vitamins. It has a superior butter-type flavor.

Pkt. 20c; oz. 75c

SALAD BOWL. 45 Days. Gold Medal Winner. All America 1952. A good quality new home garden lettuce.

Pkt., 25c; ½ oz., 55c; oz., \$1.00

"EASY-TO-HEAD"

Great Lakes (B.M., A.A.S., 1944). Imperial type. The best Summer lettuce to date, being remarkably resistant to heat drought and tip-burn. Being slow-in-going-to-seed, it insures heads, even in hot weather and by the amateur, too. Its crispy, thick leaves fold well over solid heads, which when unravelled make desirable salad pieces; most delicious.

Pkt., 25c; ½ oz., 55c; oz., \$1.00;

Big Boston (Select). Most widely used variety with light green hard heads of superior quality; edges tinged brown.

Pkt. 15c; oz., 60c; ¼ lb. \$1.50

Iceberg. Large, hard, crumpled heads, white centered; leaves broad, crisp, wavy, light green, tinged brown; quality good.

Pkt. 15c; oz., 75c ¼ lb. \$1.75

May King. The earliest heading lettuce; medium-small, round and firm; light green, tinged brown leaves; interior rich golden-yellow; buttery and of splendid quality.. Pkt., 25c; oz., \$1.00; ¼ lb., \$3.00

New York No. 12. A heat resister which does well in mid-Summer; crisp, dark green heads with slightly curled outer leaves. Large, tightly folded cabbage-like heads are well blanched; sweet.

Pkt. 15c; oz. 60c; ¼ lb. \$1.75

Bibb (57 days). Rather small head used as forcing lettuce in the South and shipped to Northern hotels where it has a reputation for excellent quality. Leaves smooth, dark green, bleaching to a rich yellow..... Pkt., 25c; oz. 75c

Cos or Romaine Lettuce

Paris White Cos. Medium dark green, suitable for greenhouse and garden. Interior leaves whitish-green, erect, smooth and concave. of fine flavor.

Pkt., 15c; oz., 70c; ¼ lb., \$2.00

KALE (Borecole)

Hardier than cabbage, this vegetable makes splendid greens for Winter and early Spring use. Flavor is improved by frost. Sow from April 15th to June 1st and transplant or thin to 18 in., as for cabbage.

Dwarf Green Curled Scotch. Wide spreading plants, finely curled and of a deep green color. Quite handsome and ornamental..... Pkt. 15c; oz. 60c

KOHL RABI

One ounce sows 100 ft. of drill. This turnip-shaped bulb combines both cabbage and turnip in its delicious flavor. Sow in Spring in light, rich soil, in rows 18 in. apart; thin out to 6 in. apart. Repeat sowings at 10 day intervals; for Fall use plant the end of July.

White Vienna, Early Short Leaved. Dwarf plants, having short green leaves and slender stems; globular 2 in. to 3 in., light green bulbs; flesh clear white, tender and crisp. Excellent forcer.

Pkt., 20c; ½ oz. 60c; oz. \$1.00

Purple Vienna, Early Short Leaved.

Pkt., 20c; ½ oz. 60c; oz. \$1.00

LEEK

One ounce sows 100 ft. of drill. Sow early in Spring in rows about 15 in. apart; for extra large stalks we suggest transplanting 10 in. apart, and to insure well blanched stems, set deep and draw the soil up as the plants grow.

Large American Flag. The most extensively used leek. It is broad leaved, with rather short but thick stems.

Pkt. 15c; oz. \$1.25

Musselburgh. The rich flavor of this extra large leek has made it popular. It is very hardy, with dark green, fan-shaped leaves; the edible stems are 6 in. to 8 in. in length..... Pkt. 15c; oz. \$1.25

MAGIC MUSHROOM TRAYS

Available from October to May

Mushrooms for home consumption can be grown in your cellar, without odor or disorder, in Magic Mushroom trays, which come filled with compost, and sown with spawn, ready to grow after you have added dirt from your garden and soaked the soil.

Shipped with complete instructions, Prices, 3 trays, \$5.00; 6 or more, \$1.50 each, all shipments by express at purchaser's expense F.O.B. Ashtabula, O. No trays will be shipped C.O.D.

PURE CULTURE IMPROVED VITA BOTTLE SPAWN

This spawn is made in glass jars under absolutely sterile conditions. After the spawn is produced it is removed from the bottle intact and placed in a carton for shipment. One bottle equals 5 bricks of ordinary spawn and is sufficient for 40 square feet. Leaflet, "How to Grow Mushrooms" free with spawn. Postpaid.

Per carton.....\$1.75 5 cartons for.....\$7.50

PURE CULTURE IMPROVED VITA BRICK SPAWN

One brick will spawn 8 to 10 square feet and comes in pure white. Postpaid.

Per brick.....\$1.00 5 bricks for.....\$4.00

OKRA

One ounce will seed 100 hills. Used for soups, stews, catsup and relishes. Sow during warm weather in rows 30 in. apart, 1 in. deep; thin to 18 in. apart, cultivate thoroughly.

Dwarf Green. Of dwarf, stocky growth, early and prolific bearer.

Perkin's Mammoth Podd. Long, slender pods, pale green and of superb quality.... each Pkt. 15c; ½ oz., 30c; ¼ lb. 90c

MUSKMELON

Requires well-enriched light, warm soil. In May, sow 10 seeds per hill, 48 in. apart each way; rotted manure added to hills is beneficial. For an early start, sow seeds in sod indoors and set out after danger of frost is past, thin out to 3 plants to a hill. Best to use **Hotkaps** to protect against frost and insects. When fruit sets, branch is pinched two leaves above the fruit to hasten maturity and enhance size of growth and quality.

Honey Dew. Large, 5 to 7 lb. fruits, smooth, hard, creamy-white skin, with practically no netting; emerald green, thick flesh ripening to the rind; juicy, tender, with a distinct flavor.

Pkt. 15c; oz. 50c

Honey Rock (G.M., A.A.S., '33). A recent introduction that has won wide favor. Medium, 4 lbs., nearly round fruit, grey-green, coarse netted; thick, juicy, orange-salmon flesh of fine flavor.

Pkt., 15c; oz., 60c; ¼ lb., \$1.80

PENNSWEET. 70 Days. This early muskmelon was awarded an All America Bronze Medal for 1955. Very early, small sized fruits notable for thick sweet yellow flesh with small seed cavity, are produced in abundance. Highly suitable for short season northern areas.

Pkt., 25c; oz., 85c; ¼ lb., \$2.50

WATERMELON

One ounce will seed 25 hills. Water melons require the same treatment as muskmelons except that they should be planted 8 ft. to 10 ft. apart.

Congo (G.M. A.A.S. 1950). In South, it produces 60 lb. melons in 90 days, in Massachusetts it matures ahead of all others; finer tasting than Dixie Queen, Cannon Ball etc.Pkt. 25c

Dixie Queen. Delicious, oval, bright red 30 lb. melon of finest texture, small seeds; productive; 85 days.

Pkt. 15c; oz. 40c; ¼ lb. \$1.25

HYBRID DIXIE QUEEN. 82 Days. Similar to regular Dixie Queen only a true F1 hybrid. The fruit are unusually sweet.

Pkt., 50c

New Hampshire Midget (G.M., A.A.S., 1951). In 60 days you can produce 7 inch, 6 lb. melons chock full of sweet, juicy red flesh.Pkt. 25c

Hybrid "Seedless"

Extra Sweet and Delicious.

This 6 lb. watermelon produces undeveloped seeds as in cucumbers and may be eaten without affecting it's fine flavor.Pkt. 10 seeds 75c

Onions

One ounce sows 100 ft. of drills. Demand rich, well spaded, and pulverized soil for a good crop; a sprinkling of chicken manure, lime and soot. Sow early in Spring in rows 15 in. apart; thin out to 3 in. apart. For early onions sow in hotbeds in February and transplant. Cultivate frequently to remove weeds and keep ground pulverized.

Early Harvest (U.S.D.A.) **HYBRID**

Will compete with Onion sets in making mature Onions. Semi-pungent. Not a storage type. Pkt., 35c; ½ oz., 85c; oz., \$1.50.

Southport White Globe. An exceptionally fine white, round, medium sized, solid, pure white and attractive; skin thin and delicate; flesh waxy white, fine grained and mild; good keeper.

Special Strain: Pkt. 15c; oz. \$1.00

Southport Yellow Globe. Specially desirable for its good keeping quality. Bulbs globular, solid, with tight fitting skins. Pkt. 15c; oz. 95c

WHITE LISBON (Bunch Onion). The best green Bunch Onions from seed are grown from White Lisbon, producing tender, long, white tops. If filled a little these green and white stalks may be consumed entirely. Does not get tough like the White Welch or Winter top.

Pkt., 25c; ½ oz., 55c; oz., \$1.00; ¼ lb., \$3.00

YELLOW SWEET SPANISH (Utah Strain). 110 Days. A sweet, mild giant onion. From seed sown direct in the garden it will produce onions weighing a pound; if started in the hot bed two pounds. Pkt., 25c; ½ oz., 70c; oz., 1.25, ¼ lb., \$3.75

ONLY PATIENCE NEEDED

To establish a Zoysia seeded lawn.

ONION SETS

One pound will plant 50 ft. of drill. Produce a fine crop of onions much earlier and surer than from seed. Plant very early in Spring 2 in. to 3 in. apart, in rows 15. in. apart.

Red } ...lb. 65c;
White } Postage
Yellow } extra

Garlic Sets Lb \$1.50

Shallots ... lb., \$1.20; 5 lbs. \$4.80.

PARSNIP

One ounce sows 100 ft. of drill. Sow early in rows 18 in. apart and cover lightly, thin to 3 in. apart. Avoid using manure. Parsnips improve after frost sets in, and as they are quite hardy they may be left in the ground during the Winter. Seed may be sown in late Fall also.

Champion Hollow Crown. Most commonly used variety, 12 in. to 14 in. long, hollow crowned and evenly tapered. Pkt. 15c; oz. 35c; ¼ lb. \$1.00

PARSLEY

One ounce sows 100 ft. of drill. Parsley seed is slow in germinating and grows best in rich, mellow, well manured soil; sow in early Spring in rows 12 in. to 24 in. apart, thin out 8 in. apart. When foliage is 3 in. high cut off all leaves of curly varieties to obtain better curled and brighter foliage.

Moss or Triple Curled. Popular and vigorous tightly curled and deep green foliaged variety. compact. Pkt. 15c; oz. 40c; ¼ lb., \$1.20

Plain (Italian). Leaves are flat, deeply cut and dark green; stronger flavored than the curled sorts. Used for flavoring and drying, very hardy. Pkt. 15c; oz. 35c; ¼ lb. \$1.00

Peas

Two pounds will seed 100 ft. row. Peas require cool temperature, plenty of moisture and long daylight for best results. The smooth peas may be planted as soon as the ground can be dug; wrinkled sorts later on until June and again in August. Sow 2 in. deep in rows (dwarf varieties), 24 in. apart; (tall sorts) 36-38 in. apart. Support all over 18 in. tall, using *Sweet Pea Netting.

Improved Gradus (World's Record) (61 days). A highly selected and earlier fruiting strain of this most popular Pea, with vines about 30 in. high. Pods contain 7 to 8 large, tender peas of finest quality.

Laxton's Progress (62 days). The largest podded and most attractive of the "Laxtonian" family; dwarf 18 in. vines. Pods contain 7 to 9 large peas of high quality.

Alaska (60 days). A real early round seeded sort that grows 30 in. high, having 6 to 8 good quality peas to the pod.

Telephone (73 days). Very productive, popular late, containing 8 to 10 light green peas of unexcelled quality, size and flavor; 54 in.

WANDO. 64 Days. ☒ A high quality heat resistant pea that is adapted to fall planting as well as spring

Freezonian. 63 days. 3½ ft. Improved Thomas Laxton, developed for freezing, combining the flavor and sweetness of its illustrious parent with hybrid vigor, hardiness and wilt-resistant. 3½ in. pods well filled with sweet delicious tender peas. Ideal for quick freezing. Needs brush or Trainettes (see page 61). An enormous cropper, Freezonian is a perfect midseason pea for home use

Prices on All Peas—

¼ lb., 60c; 1 lb., 85c; 2 lbs., \$1.50; 5 lbs., \$3.50.

Pkt., 20c;

Peppers

Sow in hotbed in March. Peppers are tender; only after danger of frost is past transplant into rich, well prepared soil 18 in. apart in rows, 30 in. apart. Hotkaps are frostproof, conserve heat and moisture. Keep the soil well cultivated and free from weeds.

California Wonder. Large, thick meated and unusually solid and heavy 4-lobed fruit, smooth and uniform, mild and sweet. Pkt. 20c; oz. \$1.00

World Beater. One of the best of the large peppers; fruits up to 5 in. long; flesh mild and thick, very productive and good shipper. Pkt. 20c; oz. 90c

HUNGARIAN OR BANANA (Sweet). 65 Days. ☒ Same as above, but sweet. This is a specialty of ours. The plants are strikingly uniform and the fruits are borne in great numbers. Pkt., 25c; ½ oz., \$1.10; oz. \$2.00

YOLO WONDER. 70 Days. ☒ A new mosaic resistant variety originating from a cross between California Wonder and Elephant Trunk, a mosaic resistant variety from Italy.

Tobacco mosaic, is a disease of egg-plant and tomatoes as well as peppers, all being cousins of the tobacco plant. It is spread by smokers, and is widely prevalent. Pkt., 25c; ½ oz., \$1.00 oz., \$1.80

PUMPKIN

One ounce plants 50 hills. Plant seed in rich soil in hills 8 ft. to 10 ft. apart each way after the ground has become warm. Thin out to 3 to 4 vines to a hill.

Large Cheese. Dependably early and productive; fruits are large, thick fleshed, deep salmon-yellow and of good quality. Pkt. 15c; oz. 40c; ¼ lb. \$1.00

Radishes

One ounce sows 100 ft. of drill. Radishes are the easiest and quickest grown vegetable. Sow seeds in finely prepared soil, in rows 12 in. apart, and thin out to 1 in. apart. They are at their best when growth is quick and steady. Temperature moderate, moisture plentiful and picked young. Make successive plantings every two weeks.

CHAMPION. 25 Days. This variety won an All America Bronze Medal in 1957 probably because it produces tasty, bright red, firm fleshed radishes that hold their quality over a long season. Tops are short, the tap root thin, and the color and flavor excellent. Pkt., 25c; oz., 50c; ¼ lb., \$1.50

Cherry Belle. (B.M., A.A.S., '49). A tangy delight from Holland. Brightest and roundest little globes you ever saw; uniform, crisp appetizers that are heat resistant and never pithy. Pkt. 15c; oz. 50c; ¼ lb. \$1.50

Early Scarlet Globe Select. Fine quality roots, very regular, uniformly bright, carmine-red; mild, crisp and tender; ready in 3 weeks. Excellent forcer. Pkt. 15c; oz. 35c; ¼ lb. 85c

French Breakfast. Oblong, 1½ in., blunt roots, of rich scarlet with white tip. Of excellent quality, better when forced. Pkt. 15c; oz. 35c; ¼ lb. 85c

Iceberg. Long, slender, 5 in. waxy white roots, brittle, crisp and extremely tender, of inviting flavor; very popular. Pkt. 15c; oz. 30c; ¼ lb. 75c

RUTA BAGA

Improved American. Desirable both for table and forage use, owing to their small tops and short neck; large globe-shaped good keeper of finest quality. Pkt. 15c; oz. 30c; ¼ lb. 90c

Spinach

One ounce sows 100 feet of drill. The most important greens crop; of easy culture, hardy; prefers cool weather or sow in Spring as soon as ground can be worked, and August to October (protect with hay for Winter use), in rows 16 inches apart; thin out to 6 inches apart.

HYBRID SPINACH #7. 42 days. Plant upright and semi-compact in habit. Foliage dark green, medium savoyed, resistant to Blue mold and mosaic. Especially adapted for early Spring or Fall. Pkt., 25c; Oz., 50c; ¼ lb. \$1.50.

Savoy Leaved Long Standing. Outstanding improved strain for late Spring and Summer use. Runs to seed slowly in hot weather. Pkt. 15c; oz. 30c; ¼ lb. 80c

New Zealand. Quite distinct, it thrives well in hot weather. The large, spreading plants have small, thick, deep green leaves, which can be picked repeatedly throughout the season; sow in hills 12 in. apart. Pkt. 15c; oz. 50c; ¼ lb. \$1.50

Perpetual Summer. In reality a form of Swiss Chard, producing large, green leaves in abundance but without the somewhat bitter taste of Swiss Chard during the Summer. Fresh leaves appear after each gathering, assuring a continuous crop until late Fall. Pkt. 15c; oz. 40c; ¼ lb. \$1.25; 1 lb. \$3.50

Squash

Due to the different characteristics and habits of growth, there are two kinds of squash, generally known as Summer and Winter squashes. The culture is similar to that of pumpkins and melons. Trailing varieties take about as much room as pumpkins and bush varieties take about the same as cucumbers.

Black Zucchini. Long, cylindrical, dark green fruits weigh 5 to 6 lbs., delicious at all stages of growth; slice when young and cook like egg plant. Pkt. 15c; oz. 45c

Butternut (New 1944). Exceedingly sweet, firm, mealy, orange fleshed squash; practically seedless except for a few seeds that are concentrated in the base; 12 in. oblong fruit; 100 days. Pkt. 15c; oz. 75c

Caserta. (G.M., A.A.S., '49). Continuously prolific, delicious new summer bush type Cocozelle; the light yellow, green striped, fat banana sized fruits can be served baked, stuffed, boiled or any method for preparing summer squash. Pkt., 25 oz. 75c

Early Prolific Straightneck (A.M., A.A.S., '38). Smaller, earlier, more productive than Summer Straightneck; brighter yellow and more uniform. Pkt. 15c; oz. 50c

Hubbard Blue (Grey) (running). Superior edible quality to other Hubbard strains; fruits large with blue-grey rind. Flesh yellow-orange, thick and of fine flavor. Pkt. 15c; oz. 40c; ¼ lb. \$1.25

BLACK BEAUTY ZUCCHINI. 60 Days. A small bush allowing close planting along with all the best qualities of Black Zucchini make this a natural for the home gardener. Pkt., 25c; ½ oz., 65c; ¼ lb., \$1.95

Table Queen or Acorn (trailing). Convenient acorn shaped, 6 in. fruits; ribbed, smooth, thin shelled and dark green; flesh light yellow. Bakes well, with sweet, inviting flavor, served in halves. Pkt. 15c; oz. 40c; ¼ lb. \$1.25

TURNIP

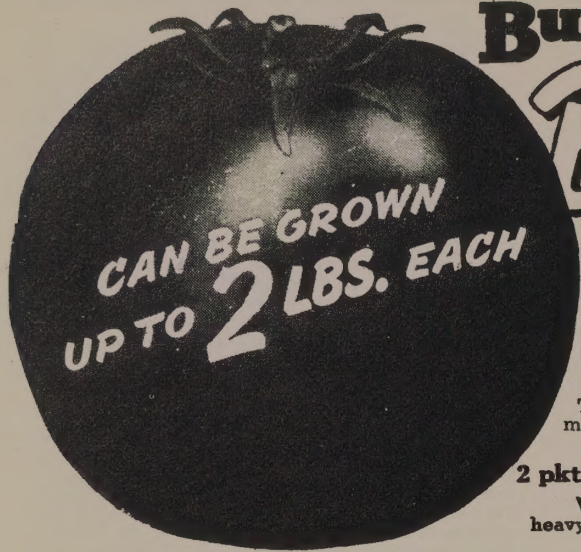

The turnip loves cool weather, potash-enriched, finely pulverized soil. Sow very early in Spring for early use, in rows 18 in. apart, in late July-Aug. for Fall use.

Purple Top White Globe. Large, white, globular root with clearly defined purple top; white flesh, sweet, crisp and tender. Pkt. 15c; oz. 30c; ¼ lb. 90c

Just Right. ☒ HYBRID ☒ ALL-AMERICA ☒ SELECTION

The best combination type Turnip ever. Heavy cut leaf foliage with smooth, white, globe-shaped roots ..

Pkt., 50c

Burpee BIG BOY® GIANT HYBRID TOMATO

Biggest Smooth, Round, Red Tomatoes Ever Seen!

Superb, extra delicious, wonderful! Solid and thick-meated, so heavy many are over 1 lb., some up to 2 lbs. each! They ripen right to the stem without cracking. *Unsurpassed for the garden.* Bring highest prices on market, roadside stands.

The Plants Bear Heavier, and Longer

Their Hybrid Vigor produces bigger yield—makes more blossoms set fruits even in bad weather.

Pkt. (30 seeds) 50¢; 1/8 oz. \$7.50

2 pkts. 95¢; 3 pkts. \$1.35;

VAUGHAN'S EARLY HYBRID. 68 Days. MA heavy yielding, very early and large fruited variety. Pkt., 35c

Tomatoes

For early plants sow seed in hotbed in February and March; if started in house don't sow before March 15th; transplant once before setting out, after danger of frost is past (preferably under "Hot-paks"), 36" apart each way. Prune vines to 2 stems and train to stakes for larger fruits and earlier maturing. Rich, loose soil is desirable, with occasional applications of nitrate of soda.

Caro-Red. Purdue variety. Orange-red Rutgers type, contains 10 times more Vitamin A than other Tomatoes. Fine, distinctive flavor. 75 days Pkt., 35c; 1/8 oz., 70c;

Crimson Cushion or Beefsteak. Large, flat, bright scarlet; solid, very prolific Pkt. 25c 1/8 oz., 95c

TINY TIM. 45 Days. The window-box tomato. Pkt. 50c

Giant Tree or Potato Leaved. 90 days. Extra large pink fruits often weighing 1 lb. or more. Pkt. 50c.

Manalucie. Wilt and blight resistant scarlet. Large, globe-shaped; crack-proof. 90 days 1/2 oz., \$1.10

Master Marglobe Supreme. Valuable for shipping and HIGHLY RESISTANT. 75 days. Extra select stock Pkt., 20c; 1/2 oz., \$1.00

Oxheart. 90 days. Extra large, heart-shaped, few seeds, mild flavor. NON-ACID Pkt., 25c; 1/8 oz., 60c;

Ponderosa. Extremely large; purplish pink, few seeds, mild flavor. 85 days Pkt., 25c; 1/8 oz., 95c;

WHITE BEAUTY. 80 Days. A novelty 1/8 oz., 70c; Pkt., 35c;

Swiss Chard

One ounce sows 50 ft. of drill. Cultivate like beets but thin out to 8 in. apart. The tops are used like spinach and mid-ribs and stalks can be used like asparagus. Gather only outer leaves; inner leaves will continue to grow so repeated pickings may be had.

Giant Lucullus. Upstanding in habit of growth, yellowish-green leaves, heavily crumpled; broad, thick stems. Pkt. 15c; oz. 35c; 1/4 lb. \$1.00

TOMATOES

Pritchard. Fine all-around variety, heavy yielder; second early; WILT-RESISTANT Pkt., 25c. 1/2 oz., 95c.

Rutgers. Red, smooth, thick walls—firm and mild. Does well even at a low fertility level. Favorite Pkt., 20c; 1/2 oz. 95c

Small Fruited Tomatoes.

Red Cherry Strawberry
Red Plum Yellow Pear
Pkt. each 25c; Yellow Plum

ROMA. Fusarium Wilt Resistant.

75 days. This excellent paste tomato adds fusarium wilt resistance to the fine qualities of Red Top. Roma's fruit are of similar plum or pear shape with fleshy, thick walls, high solid content and few seeds. They are borne in the same almost unbelievable numbers on the spreading, determinate vines, and their color is excellent both inside and out. A most valuable variety for wilt sections and can be highly recommended anywhere. Pkt., 35c; 1/4 oz., 70c 1/2 oz., \$1.25

Red F₁ Hybrid No. 23 ●

ball shaped smooth bright red skin. Weight 1/2 to 3/4 lb. highly resistant against diseases. Earlier maturing than Rutgers and is almost 50% heavier yielder Pkt. 35c

FANCY LEAVED CALADIUMS

Captivating, ornamental, varied colored foliage plant, gorgeous colors, brilliantly veined and mottled; for pots, window boxes and bedding out. All the necessary requirements are shade, heat and moisture.

CANDIDUM. Snow-white, green veins.

FANNIE MUNSON. Rose with scarlet ribs.

ITACAPUS. Dwarf dark red with brighter red spots. One of the best.

FREIDA HEMPLE. Dwarf, very bright vivid red. Considered by some finer than Poecile.

MRS. W. B. HALDEMAN. Red center, green edge.

PINK CLOUD. Crinkled pink leaves with mottling.

PINK LADY. New. Pink, red midribs, green border.

POECILE ANGLAIS. Deep crimson bordered metallic green, vigorous and popular.

SUNBURST. Bright red center, red spots surrounded by gold hue.

WHITE CHRISTMAS. New. Similar to Candidum. White, green midribs and margin.

1 1/2" Bulbs: 5 \$2.00; 10, \$3.00; 100, \$20.00
2 1/2" Bulbs: 5, \$2.75; 10, \$5.00; 100, \$35.00

Jumbo Bulbs 3.25; 10 \$6.00; 100, \$45.00

MINIATURE GLADIOLUS

This new race of small but decorative varieties are especially suitable for cut flower arrangements. Excellent for shows.

ARIA—Deep Pink.

ATOM—Scarlet with Gold Picotee edge.

BO-PEEP—Ruffled Salmon Pink.

CLASSY-CHASSIS—Pure Yellow.

MELLOW FELLOW—Red.

OLD SOUTH (Novelty)—Smoky, Brown.

SWANKY—Pure Salmon.

WHITE RIBBON—White.

MINIATURE MIXED—Blend of all varieties.

Doz., \$1.50; 25, \$2.75; 100, \$10.00.

BUTTERFLY GLADIOLI

Miniature flowers of exceptionally brilliant colors, each marked with a darker color in the center. Flowers are graceful, and most popular in Holland as cut flowers. Assorted varieties and colors, 2 each of 5 varieties separately bagged and labeled, 10 Bulbs for \$1.00; 100, \$9.00.

Jumbo Gladioli

REGULAR MIXTURE.

10, 75c; 25, \$1.75; 100, \$6.00

GLOXINIAS

Extra fine pot plants.

Scarlet, Purple, Scarlet bordered, White, Purple bordered, Spotted, Rose, Rose bordered or Mixed.

Jumbo Bulbs....Doz. \$6.00 Large \$4.50.

DID YOU KNOW THAT—

Zoysia lawns are ideal for seashore, Salt water does not affect Zoysia.

BEGONIAS Tuberous Rooted

Anyone can grow begonias and in the shade, too; in beds or as pot plants.

Camellia. Camellia-like flowers, double. **Carnation.** Frilled and serrated, double. Any above in following colors: Red, Scarlet, Rose, Pink, Salmon, Orange, Yellow, White and Mixed.

Extra Large Bulbs (1 1/2")

5, \$1.50; 10, \$2.50; 100, \$23.50

Jumbo Bulbs (2")

5, \$1.85; 10, \$3.40; 100, \$32.50

TUBEROSES

Its delightful fragrance permeates great distances. Invaluable cutflower. For earlier blooming, start in pots and set out in warm weather.

THE PEARL. Double white disease free bulbs. **Jumbo**.....10, \$2.25; 100, \$20.00

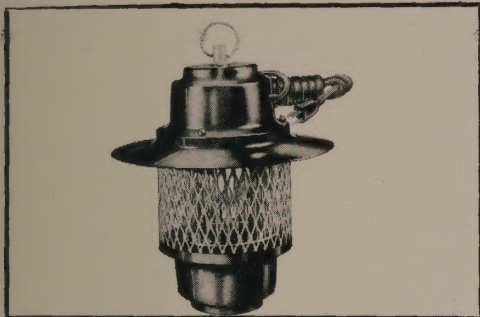

HAVAHART ANIMAL TRAPS

No. 1—5x5x18 in. For weasels, rats and chipmunks, \$5.40, postpaid.

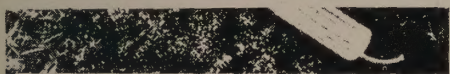

No. 2—7x7x24 in. For muskrats, mink, squirrels and rabbits, \$6.75, postpaid.

No. 3—11x11x36 in. for Coon, woodchuck, rabbits, opossum, cats, etc. Each \$14.00, express collect.

Bug Killer Destroys Flying Insects

A boon to Gardens, Patios and Yards. Safe for children and pets. Inner bulb attracts insects — electrically charged grids kill insects instantly. Operates on 110 volts for less than a penny a day. Baked enamel black finish — brass plated grids. Weather-proof, safe, economical. Postpaid \$29.95.

Sure Death to All Burrowing Pests

GOPHER GASSERS, QUICK DEATH TO MOLES, GROUND SQUIRRELS, RATS. Woodchucks and many other destructive burrowing animals. Easy and safe to use—simply light fuse and insert cartridge into holes and runways. TOXIC GASES kill rodents by suffocation and poisoning. Use 1 cartridge every 10 to 15 feet. Price, package of 6 cartridges for \$1.00; postpaid \$1.10.

CANVAS SOIL SOAKER

Soil Soaker for deep soaking, the water method approved by agricultural colleges and nurseries, now available for home use. Equipped with regular hose connection for attaching to hose or pipe.

No. 0, 12 ft. \$2.10, postpaid \$2.25
No. 1, 18 ft. 2.85, postpaid 3.05
No. 2, 30 ft. 4.10, postpaid 4.30
No. 3, 50 ft. 6.50, postpaid 6.80

STAKES—HEAVY TONKIN. Natural Color Heavy weight bamboo, entire stake same weight; do not taper. Ideal for roses, dahlias, young trees, tomatoes, etc.

GARDEN TOOLS

SEE PAGE 32

KNEE PADS

Well-made knee pads. Neatly molded with sponge rubber insert. Complete with straps. In two sizes, Men's (Black) or Ladies' (Pink). Ladies' pads, do not have sponge rubber insert.

Men's, \$2.40, postpaid.
Ladies', \$1.75, postpaid.

Protects your GARDEN
